📄 SUMMARY

M.Tech candidate in Fuel & Energy from IIT (ISM) Dhanbad with a strong technical background in climate tech R&D and quantitative analysis. Proficient in Python, SQL, statistical modeling, and data handling for analyzing complex energy datasets. Combines deep domain knowledge in fuel technology, biochar, and carbon markets with data analytics to deliver actionable research insights and operational efficiency.

🧠 SKILLS

Programming & Data

Analytics:: Python, SQL (Data Manipulation, Handling, Querying), Database Design, Statistical Modeling, Data Cleaning & Validation

Energy & Domain Knowledge:: Fuel & Energy Technology, Carbon Markets & Credits, Proximate Analysis, Bioenergy & Biocoal, Emissions Testing, Quality Assurance (QA/QC)

Tools & Frameworks:: Power BI / Excel Analytics, Market Trend Research, Process Automation, Data Pipelines

📁 PROFESSIONAL EXPERIENCE

R&D Intern (Data & Research Analyst), Climitra Carbon Pvt Ltd.

08/2026 – Present

- **Analyzed complex experimental datasets**—including proximate analysis, Gross Calorific Value (GCV), and emissions metrics—to evaluate biochar energy output and qualify products for carbon credit certification.
- **Executed statistical data modeling and quantitative trial testing** on thermal processing equipment to optimize thermal yield and improve system performance.
- **Structured and maintained quality assurance (QA) datasets** to track material specifications, enforce compliance standards, and support data-driven decision-making.
- **Leveraged Python and SQL for data handling and workflow automation**, converting raw testing data into analytical reports for cross-functional teams

Graduate Engineering Trainee, Imperial Granite Pvt Ltd.

02/2023 – 03/2024

PGPT, Western Coalfield Ltd.

12/2020 – 05/2021

Summer Intern, South Eastern Coalfields Ltd.

05/2018 – 05/2018

Summer Intern, National Mineral Development Corporation

06/2017 – 06/2017

Summer Intern, South Eastern Coalfields Ltd.

06/2016 – 06/2016
