Professional Summary

M.Tech (Fuel & Energy Engineering) candidate with strong foundations in energy systems, numerical modelling and Python-based data analysis, seeking to apply statistics and SQL to energy market research.

Education

Indian Institute of Technology (Indian School of Mines) Dhanbad

Masters of Technology in Fuel and Energy Engineering

Dhanbad, Jharkhand

Expected May 2027

CGPA: 8.22/10 | **Relevant Coursework:** CFD, Energy Technology, Powerplant Engineering, Alternate Energy System, Numerical Methods.

Lakshmi Narain College of Technology

Bachelors of Technology in Mechanical Engineering

Bhopal, MP

2017 – 2021

CGPA: 8.45/10

Projects

Global Energy Market Analytics: Python–SQL Pipeline & Power BI Dashboard

- Built a Python (Pandas) pipeline to collect, clean and validate electricity generation and fuel price data from public sources (EIA, Ember) into a SQL database.
- Wrote SQL queries (joins, CTEs, window functions) to analyse generation mix and YoY growth across coal, gas, solar, wind and hydro.
- Developed a time-series forecasting model (ARIMA / regression) for renewable share, evaluated using MAE and RMSE.
- Designed an interactive Power BI dashboard to communicate key insights clearly.

Design of a Hydrogen-Blend ICE with IoT-Based Monitoring

- Optimized a gasoline engine for a 20% hydrogen blend, improving thermal efficiency by 18%.
- Integrated hydrogen injectors and modified combustion chambers using CAD tools.
- Built an IoT setup (NodeMCU) streaming real-time pressure, temperature and airflow data.
- Applied theoretical design to experimental validation and interdisciplinary problem-solving.

Technical Skills

- **Programming & Data:** Python (NumPy, Pandas, Matplotlib, SciPy, scikit-learn), SQL, Data Cleaning.
- **Analytics & Modelling:** Statistical Analysis, Forecasting, Machine Learning (basics), Numerical Methods, CFD, FVM.
- **Databases & Visualization:** SQL Database Design, Power BI, Excel, Matplotlib, SigmaPlot.
- **Core Competencies:** Thermodynamics, Fluid Mechanics, Machine Design, Power Plant Engineering, Fuel Technology.
- **Tools:** MATLAB (Certified), AutoCAD, MS Office (Word, Excel, PowerPoint).

Social Engagements

- **Class Representative**, Department of Fuel and Energy Engineering, IIT (ISM) Dhanbad.
- **Participant**, International Conference on Thermofluids Engineering (INCOTHERM-2025), IIT (ISM) Dhanbad.
- Contributed to college-level technical fests and workshops, encouraging knowledge sharing among peers.
